

RAFAEL SANT' ANNA

Senior Software Engineer | React | Laravel | Node.js | .NET/C#

Viseu, Portugal | +351 926 979 735 | dev.rafaelsilva@gmail.com

linkedin.com/in/devrafaelsantanna | rafaelsantanna.github.io

Professional Summary

Senior Software Engineer with more than 10 years of experience developing SaaS platforms, LMS/LXP solutions, marketplaces, mobile applications, enterprise systems, and Artificial Intelligence automations.

Specialized in React, Vue.js, Laravel, Node.js, .NET/C#, React Native, and API-driven architectures. Experienced in transforming complex operations into scalable digital products, with a focus on administrative interfaces, web portals, mobile applications, enterprise integrations, reporting, automation, and RAG.

Key Highlights

- More than 10 years of full-stack software development experience.
- Participation in more than 15 corporate and educational LMS/LXP projects.
- Experience with government projects in Brazil and Portugal.
- Experience with SaaS, e-learning, marketplaces, events, logistics, healthcare, education, real estate insurance, and internet infrastructure platforms.
- Experience with clients and contexts such as Santander, Coca-Cola, Renault, Hyundai, TIM, Embraer, Vale, Bradesco, PicPay, Safra, Grupo Profarma, Inov Engenharia, and SOS Bolsas de Estudo.
- Hands-on experience with Generative AI, RAG, bots, Telegram/WhatsApp automations, and cryptocurrency trading systems.

Professional Experience

Affinity / Axians | Senior Full Stack Developer | Aug 2025 - Apr 2026

Project Description

Academic management, digital enrollment, administration, and assessment platform for a large education operation. The project combines long user journeys, complex business rules, secure authentication, permissions, Laravel APIs, and a modular React interface.

Key Responsibilities

- Development of multi-step digital enrollment journeys with states, documents, conditional validations, and student data management.
- Implementation of complex forms, reusable components, Zustand state patterns, and responsive interfaces with Tailwind CSS.
- Development of administrative dashboards, assessment flows, authentication, authorization, RBAC, and integration contracts between frontend and backend.
- Creation and evolution of REST APIs with Laravel 11 and PHP 8.4, including validations, business rules, and authenticated endpoints.

Results Achieved

- Participated in delivering a project originally planned for more than one year in approximately 6 months.
- Delivered more than 200 improvements and features across frontend and backend.
- Evolved critical modules for academic operations, reducing friction for administrative users.

Technologies Used

React 19, TypeScript, Zustand, Tailwind CSS, Laravel 11, PHP 8.4, REST APIs, RBAC, Git.

Revvo | Senior Full Stack Developer | Jun 2019 - Aug 2025

Project Description

LMS/LXP platforms, digital learning, corporate education, digital content, dashboards, enterprise integrations, and AI applied to learning.

Key Responsibilities

- Development and customization of corporate learning platforms, including Moodle, LearningFlix, learning paths, courses, certificates, rankings, and gamification.
- Integrations with ERP, CRM, BI, Microsoft Teams, Active Directory, HR tools, and internal client systems.
- Development of dashboards, reports, React/Vue components, Laravel/Node.js APIs, and client-specific custom flows.
- Participation in the architecture and evolution of the JUDY AI assistant for interaction with the learning ecosystem.

Results Achieved

- Delivered more than 15 corporate and educational LMS projects.
- Participated in AI initiatives applied to corporate education.

Relevant Clients

Santander, Coca-Cola, Renault, Hyundai, TIM, Embraer, Vale, Bradesco, PicPay, Safra, GOL, Grupo Boticario, Seguros Unimed, Casa & Video, CEDAE, BeFly, 3 Coracoes, Mackenzie, IPOG, and SEBRAE.

Technologies Used

React, Vue.js, Laravel, Node.js, Moodle, PHP, SQL, REST APIs, SCORM, BI integrations, AI.

Trinks | Frontend Developer | Jun 2017 - May 2019

Project Description

Management platform for beauty salons, barbershops, aesthetics clinics, studios, networks, and franchising, with online scheduling, financial management, customer relationships, and administrative tools.

Key Responsibilities

- Development of administrative interfaces, backoffice, responsive pages, and online scheduling flows.
- Implementation of features related to calendars, professionals, customers, services, reports, financial control, commissions, inventory, invoices, loyalty, and WhatsApp messaging.
- Integration of web experiences with channels such as proprietary websites, Instagram, Facebook, and Google Reserve.

Technologies Used

AngularJS, Vue.js, JavaScript, HTML5, CSS3, ASP.NET.

Agencia aspectI | Full Stack Developer | Jun 2014 - Jun 2017

Project Description

Development of enterprise systems for healthcare, education, retail, engineering, logistics, and administrative operations, working across analysis, modeling, backend, frontend, databases, mobile applications, testing, deployment, and maintenance.

Key Responsibilities

- Requirements gathering, data modeling, and development of APIs and web applications with ASP.NET, C#, SQL Server, Vue.js, jQuery, and CSS frameworks.
- Development of administrative flows, dynamic forms, approval workflows, notifications, timesheet, team management, and mobile applications.
- Participation in systems with national usage, high request volume, and operation-critical internal processes.

Highlighted Projects

- Grupo Profarma - integrated platform for tickets, workflows, dynamic forms, teams, messages, electronic time clock, and notifications, with more than 10,000 users.
- Grupo Profarma Varejo - accounts and maintenance management for 226 stores, with alerts, history, due dates, and validations.
- Inov Engenharia - administrative ticketing system and complaint portal required by PROCON.
- SOS Bolsas de Estudo Online - platform connecting students with partner institutions offering scholarships.

Technologies Used

ASP.NET MVC, ASP.NET Web API, C#, SQL Server, Entity Framework, Ionic, Vue.js, jQuery, Bootstrap, Materialize, Semantic UI.

Selected Projects

EdgeData | Infrastructure Operations and Predictive AI

Critical infrastructure platform for managing thousands of servers and internet devices, with browser-based SSH, script automation, RBAC, and predictive failure analysis to reduce outage risks.

Technologies: .NET Core, REST APIs, SSH, automation, RBAC, and predictive analysis.

BWA Transportes | Fleet Management

Mobile application and backend for truck fleet management, centralizing vehicle, route, driver, field operation, and administrative user data.

Technologies: React Native, Node.js, APIs, and logistics integrations.

Technical Skills

Frontend: React, React Native, Vue.js, AngularJS, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS.

Backend: Node.js, Laravel, PHP, .NET/C#, ASP.NET Core, ASP.NET MVC, REST APIs.

Databases: PostgreSQL, MySQL, SQL Server.

Mobile and Automation: React Native, Ionic, RAG, Intelligent Assistants, Telegram Bots, WhatsApp Automations.

Methodologies: Scrum, Kanban, Agile Development, continuous integration, and incremental delivery.

Education

Bachelor's Degree in Information Systems - Fundacao Educacional Unificada Campograndense (2014 - 2017).

Languages

Portuguese (Native) | English (Intermediate - B1).
